Trim

Bleed

with Round Corner Options

The diagram shows a square plate with a central red circle representing a drill hole. Three concentric lines are drawn around the hole: an innermost green line, a middle red line, and an outermost blue line. The text explains the purpose of each line: the green line is the safety margin, the red line is the trim size, and the blue line is the bleed area for graphics. The text is contained within the green safety margin.

Safety: No TEXT beyond this line.

Trim: Final trim size ordered.

Blead: To ensure ink coverage goes to the very edge of the product, make certain to extend any graphics/artwork past the *Trim* to the *Blead* line.
